HiKOKI technologies.

MV

MULTI VOLT is the most intelligent 36V battery system yet. It combines the best high-performance power tools with our most powerful batteries and accessories for your consistently high performance. One battery pack, two voltages - depending on the tool - the voltage automatically switches to 18V or 36V, making it compatible with tools of both voltages.

BRUSHLESS

Due to a more compact design than brushed motors, brushless motors allow for smaller and lighter tools. Even under heavy use, the brushless motors significantly extend the product's service life without the inconvenience of armature burn-out, short circuits or commutator wear. Plus, they do not require the regular replacement of carbon brushes.

TORQUE BOOST BRUSHLESS

Torque Boost ensures dynamic power and effortless cutting. The motor has two preselectable modes: Auto switch mode and High torque mode. In the Auto switch mode, when the electronics detect changes in the workpiece structure, it automatically switches between highest blade speed and High torque to guarantee highly efficient and fast cuts.

RFC

When the tool bit is suddenly overburdened during operation, Reactive Force Control stops the motor to reduce twisting of the main unit preventing user injuries.

RHB

An internal double-insulation construction with a very sturdy aluminium die-cast body is incorporated to make the housing more rigid enhancing the durability of the motor unit significantly.

LVH

Low Vibration Handle consists of rubber dampers and/or hinges to reduce vibration and user fatigue.

UVP

Our original, spring-type dynamic vibration absorber with a weight and two springs/spring leaf moves in the opposite direction to the vibration direction of the main body. This results in reduced vibration and improved operating efficiency.

IP54 IP55 IP56 IP65

The IP-code rates the degree of protection against dust and water ingress. HiKOKI tools that are IP-rated come with silicon-coated electronics protecting the tool.

- IP54:** Protected against dust. Protected against splash water.
- IP55:** Protected against dust. Protected against water jets.
- IP56:** Protected against dust. Protected against powerful water jets.
- IP65:** Completely dust tight. Protected against water jets.

AIR SPRING DRIVE SYSTEM

Our unique Air Spring Drive System uses the compressed air sealed in the main unit. It drives up to 3 nails per second with zero ramp-up time, and it sets nails flush consistently without combustion noise or gas fumes.

LED LEVEL

LED level indicates if tool is held straight to achieve precisely drilled holes.

TRIPLE HAMMER

Triple hammer reduces vibration by making three impacts per rotation instead of the conventional two. The results are lower vibration levels, greater operator comfort, and ease of use with less cam-out.

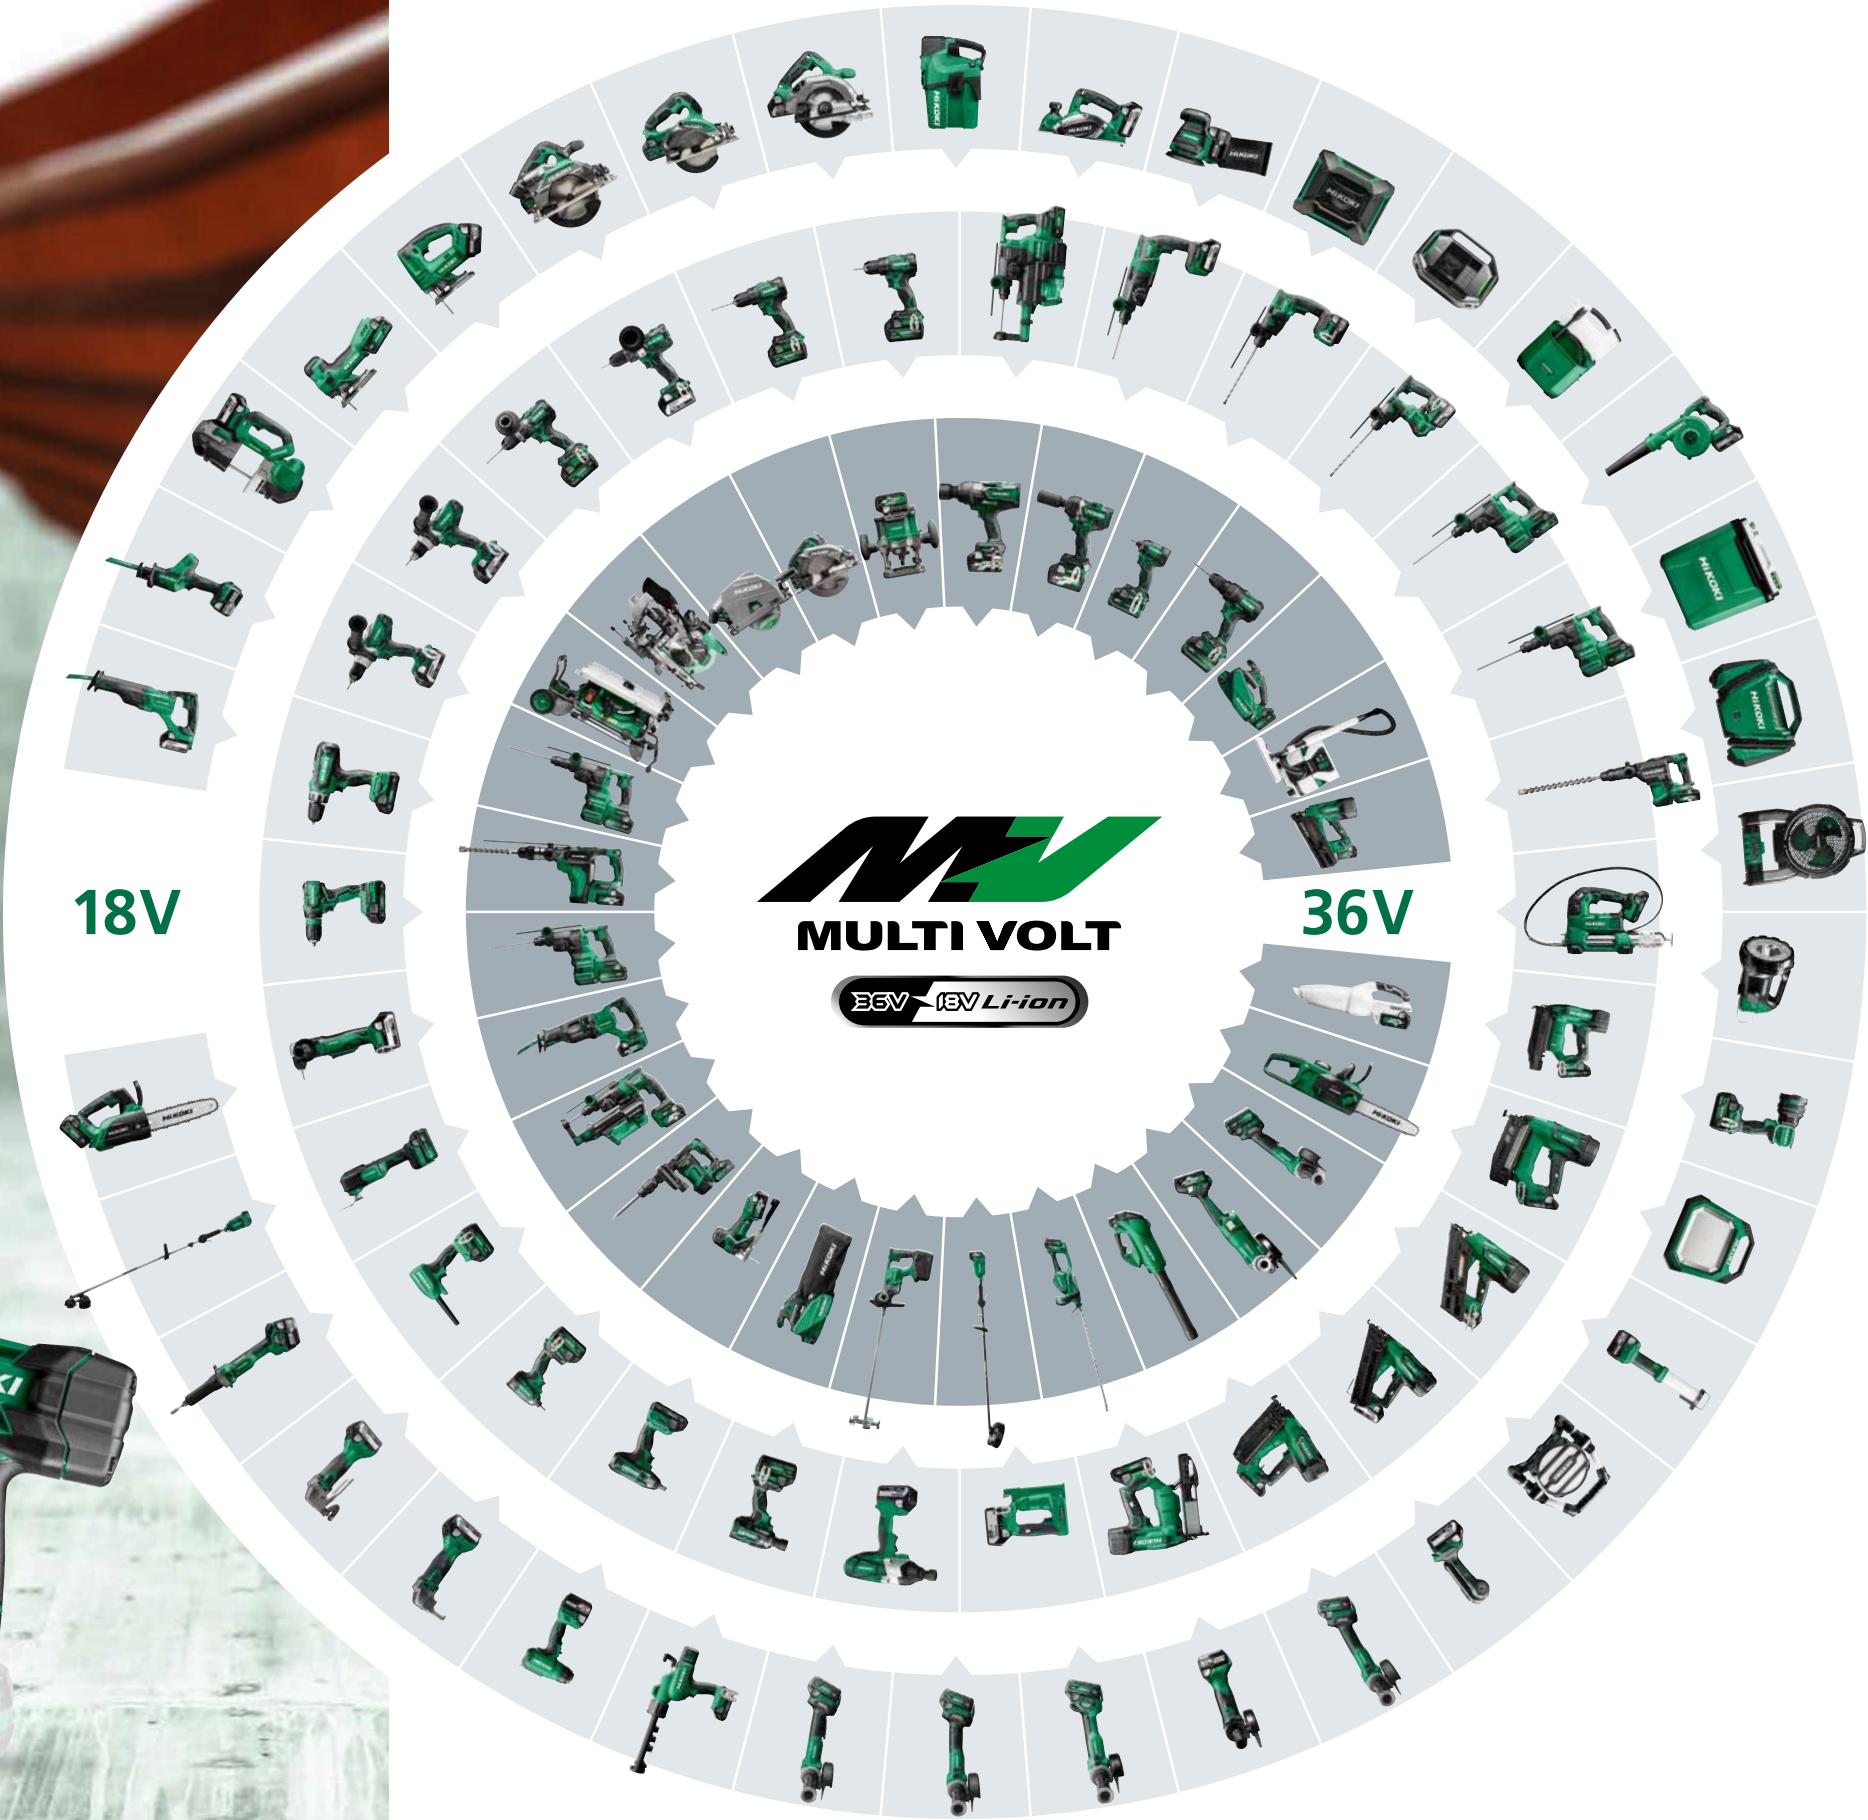

Endless flexibility.

Our innovative MULTI VOLT battery powers a wide range of cordless power tools. Moreover, this battery is compatible with 36V and 18V power tools, even with your Hitachi tools. Now you can cut, grind, drill, and mow with the power you are used to, but with the ultimate freedom to work wherever you want.

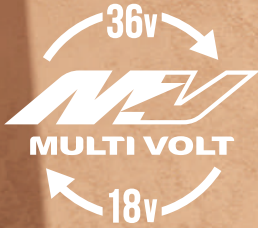

36V ← → 18V

Ultimate power for your 36V and 18V tools.

- The most powerful batteries for your 36V and 18V tools
- Smart electronics switch voltages automatically
- Improved drop and water resistance

Automatic Switching System to switch between 18V and 36V | 36V nominal voltage and up to 41V after charging | Intelligent electronics ensures constant communication between tool, battery and charger | Improved water resistance and drain outlets for prolonged lifetime | 15% improved shock resistance via dual-layer elastomer base | Integrated 4-LED display shows remaining battery charge | Higher power output achievable than with similar sized 18V batteries.

Cordless Driver Drill
DS36DC

36V - torque: 155 Nm hard/100 Nm soft
Industry's top class power and drilling speed | Robust aluminium gear housing provides additional rigidity | Reactive Force Control technology with Gyro sensor | Compact body | Constant speed control | Metal chuck with carbide inserts for highest gripping force | Rotatable side handle | Ergonomic soft grip handle.

- Industry's top class power, 155 Nm
- Robust aluminium gear housing
- RFC with Gyro sensor

18V

Cordless Driver Drill
DS36DA

36V - torque: 130 Nm
Best suited in remote construction sites where there is no power supply for drilling in wood, Aluminium, for fixing windows & Door frame.

- Drilling Capacity 102mm in steel
- Reactive Force Control Mechanism helps the operator to work safely avoiding kick back when bit gets struck due to overload.

- Industry's top class power, 130 Nm
- Robust aluminium gear housing
- RFC with Gyro sensor

 Compatible

18V

Cordless Automatic Screw Driver
W 18DB

- 18V brushless 3000 rpm drywall screwdriver for fastening wood boards or other boards on wood framing
- The compact and ergonomic screwdriver provides precise guidance and power transmission in the screw axis, reducing the chances of errors and ensuring accurate results.
- Compact and light design allows comfortable one-hand operation, reducing the strain on the user's wrist and hand.
- Able to hold a large number of screws, the magazine reduces the need for frequent reloads, minimizing downtime and allowing users to complete tasks more quickly.
- The magazine processes standard screw strips with screws ranging from 25-57 mm long, max. head dia. of 9.5 mm, and max. shaft dia. of 5.0 mm, offering versatility for different applications.

Caulking Gun

Cordless Caulking Gun
AC18DA

18V

I Easy Dispensing of High-Viscosity Sealants

With 3,000N of dispensing force, the AC18DA cordless caulking gun delivers adhesives and sealants smoothly and steadily without the hassle of a cord.

I Optimal Speed

A variable speed trigger and speed dial control allow for easy speed adjustment.

I Can Be Placed Upside Down

Can be placed upside down with the cartridge inserted when not in use.

I Anti-Drip Mechanism

The auto reverse feature prevents unwanted dripping of material when the trigger is released.

I Built-in LED Light

Illuminates the work space when used in darker areas.

Runtime per Charge*1 (Using BSL1820M battery)

Silicone Sealant φ5mm Nozzle Up to 165 Cartridges	Urethane Sealant φ10mm Nozzle Up to 180 Cartridges	Acrylic Adhesive φ8mm Nozzle Up to 165 Cartridges

Corded Diamond Cutter
CM5SB

5" Cutter

- Power input 1,300W and max power output 1,900W with overload durability
- Efficient dust extraction for high user protection and a clean construction site
- Spindle lock for quick and easy blade change
- Auto-stop carbon brushes for a long tool life
- 15° forward angled side handle for ergonomic guidance

- No Load Speed - 11,000/min.
- Wheel Dia. - 125mm
- Max Cut Depth - 33mm

MRP

16,800/-

Corded Marble Cutter
CM4SB2

4" Cutter

- Best suited for granite cutting and Artistic applications.
- Powerful motor with 1,320W works efficiently even in overload condition
 - Metal bush on a ball-bearing and sealed armature coil for durability and long life
 - Operator can work comfortably with soft grip handle

- No Load Speed - 11,500/min
- Cut Depth per cut - 20mm
- Max Cut Depth - 34mm

MRP

6,750/-

Corded Circular Saw
C7SS

190mm - Blade Dia

- Equipped with the powerful 1050W motor
- Max Cutting - 68mm, depth 90°
- Max Cutting - 46mm, depth 45°

MRP

7,830/-

Corded Circular Saw
C7ST

190mm - Blade Dia

- Equipped with the powerful 1050W motor
- Max Cutting - 62mm, depth 90°
- Max Cutting - 47.5mm, depth 45°

MRP

12,000/-

Perfect high precision cuts.

Corded Miter Saw C12RSH3

1,520 W - Ø305 mm
cutting depth (90°) - 105 x 312 mm

Shadow line technology perfectly marks the cutting line | Convenient bevel adjustment on the front | Compact sliding system with double guides | The table can be extended on the right and the left | Positive stops for fast and accurate mitre adjustments.

230V

Corded Compound Mitre Saw C12FDHB

12" Compound Mitre Saw

Suitable for profile cutting of aluminium frames for Windows & Doors also for Wood

- **XACT CUT LED Shadow Line System:** Precisely shows the cutting line on material under any lighting condition.
- **Compound Cutting:** Offers a wide range of mitre and bevel cutting options.
- **Fences:** 7" tall sliding fences support vertical and nested molding cuts.
- **Extra Large Base:** Provides excellent material support and stability.

No-Load Speed - 4,300 RPM

Blade Dia - 305mm

MRP

41,000/-

Corded Table Saw C10RJ

AC 254mm Table Saw

- Adjustable rip fence and outfeed support for larger cutting capacity.
- Stable and durable fold and roll stand for easy transportation

No Load Speed - 4,500 (min-1)

Powerful 1,500W motor

MRP

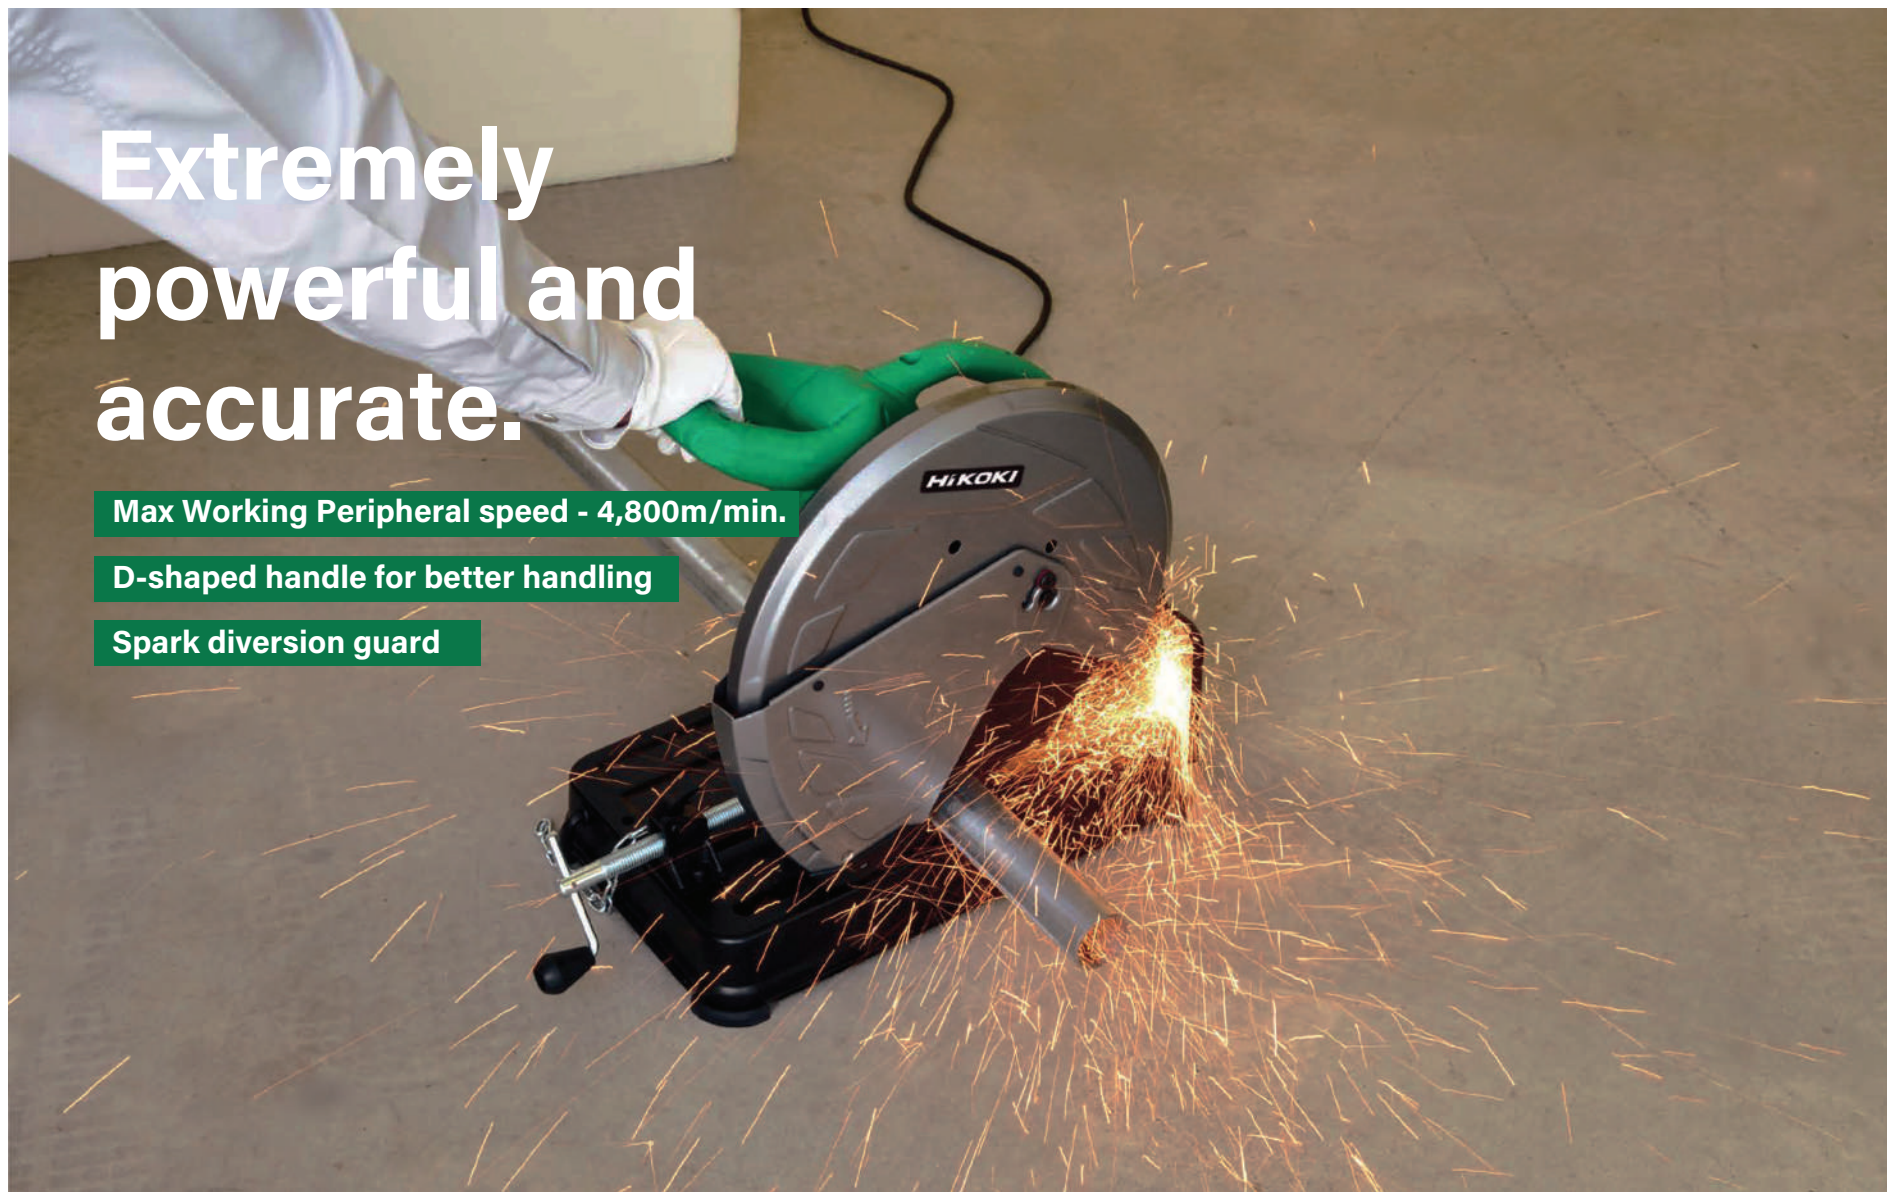

78,000/-

Extremely
powerful and
accurate.

Max Working Peripheral speed - 4,800m/min.

D-shaped handle for better handling

Spark diversion guard

Cut Off Machine CC14STD

Ø355mm

- Quick lock vise for perfect clamping of the workpiece.
- Spark diversion guard for user safety.
- Spindle lock for perfect clamping of cutting wheel.
- Heavy duty cutting of Rebars, Hollow pipes, channels

No Load Speed - 3,800/min.

Power Input - 2,200 W

MRP

17,970/-

Cut Off Machine CC14STA

Ø355mm

- Lightweight design
- Quick lock vise
- Spark diversion guard
- With Spindle lock mechanism

No Load Speed - 3,900/min.

Power Input - 2000 W
